NOTICE

The right is reserved to change the construction or material of any parts where it seems desirable to do so without incurring the obligation of installing such changes on units already delivered.
Additional publications pertaining to this model and to all other FIATALLIS products are available through FIATALLIS dealers. Publications are generally available in several languages.
Refer to Service Publications Index form 604.07.026 for all such publications; the index is available from FIATALLIS dealers.

INSTRUCTIONS FOR ORDERING PARTS

At the time of this parts catalog was published the listed part numbers were current. It is our policy to constantly improve our machines and therefore, part numbers and design may change.
When ordering parts, verify part numbers through your dealer who has the latest parts information.

ORDER PARTS FROM THE DEALER COVERING THE LOCAL TERRITORY

Orders for spare parts must include the following data (see page 4):

- Model, Serial Number (Product Code and Unit Number), Engine model, Engine serial number (marked on engine block).
- Specify the part number (shown on Spare Parts Catalog list,) possibly completed by its description . If parts refer to an assembly which has a model or serial number, also include this information.
- Give post office address, town, county and state were parts are to be shipped.
- Also specify whether material is to be shipped by freight, express or parcel post, by surface or by air.
- Confirm all telephone or telegraph orders in writing.

Parts can only be returned to/through the dealer from whom the parts were purchased and must have prior written authorization. Each return will be treated individually.
Unless claims for shortages or errors are made immediately upon receipt of goods, they will not be considered.
When damaged goods are received, a full description of the damage should be made by the carrier agent on the freight bill.
FIATALLIS responsibility is limited, and ceases upon completion of sale conditions provided for each delivery.

HOW TO USE THE CATALOG

To locate parts correctly, consult the alphabetical index on page 3/3 or the numerical index on page 6. Both indexes will refer to the subgroup number in which the part is listed. The parts catalog is divided into major sections as listed on page 10, identified by the alpha digit of the subgroup number.

The catalog's illustrations and parts lists will provide the following information:

(1a) and (1b) Subgroup number.

(2a) and (2b) Sheet number, used when one subgroup covers several sheets.
(2c) Indication that the parts list takes more than one page (in the example page 1 of 2).

(3a) and (3b) Subgroups followed by / after the number indicates an optional or special equipment.

(4) Updating indication. Example indicates that the last revision of this subgroup was made in February, 1981.

(5) Subgroup title.

(6a) Symbol indicating that a Repair Kit is included in the subgroup. In the example, the Kit, Item 12, includes items 2 through 4(6b). The itemized components of each kit are listed on page 9 and are also identified as individual items (6c).

(7a) Item. Key number cross referring the illustration item (7b) to the relevant part number (8).

(7c) The item number can be replaced by a subgroup number (example L304) meaning that that item is listed in another subgroup.

(8) Part number. Number for ordering parts.

(9a) QTY. Total quantity of parts for one unit.

(9b) —. The quantity to be established as required.

(10) Code. Translation code for reference to the dictionary (lexicon) provided separately for interpretation of the description in languages other than English and Italian.

(11) Description. Description of the part in English and Italian. In case of modifications, the part description is completed by EFFECTIVE SERIAL NUMBER INDICATIONS and DIRECTIONS FOR REPLACEMENT (as applicable).

Examples of Effective Serial Number Indications:
(12a) PRIOR TO UNIT NO. 00201, install on machines with serial numbers up to 00200.

(12b) UNIT NO. 00201 AND UP, install on machines with serial number from 00201 and up.

Examples of Directions for Replacement:
(13a) and (13b) Series 46C and 56M, indicates the whole subgroup or a specific part number is used on units identified by these product codes (see page 4).

Other useful indications may be provided under DESCRIPTION (11) such as:

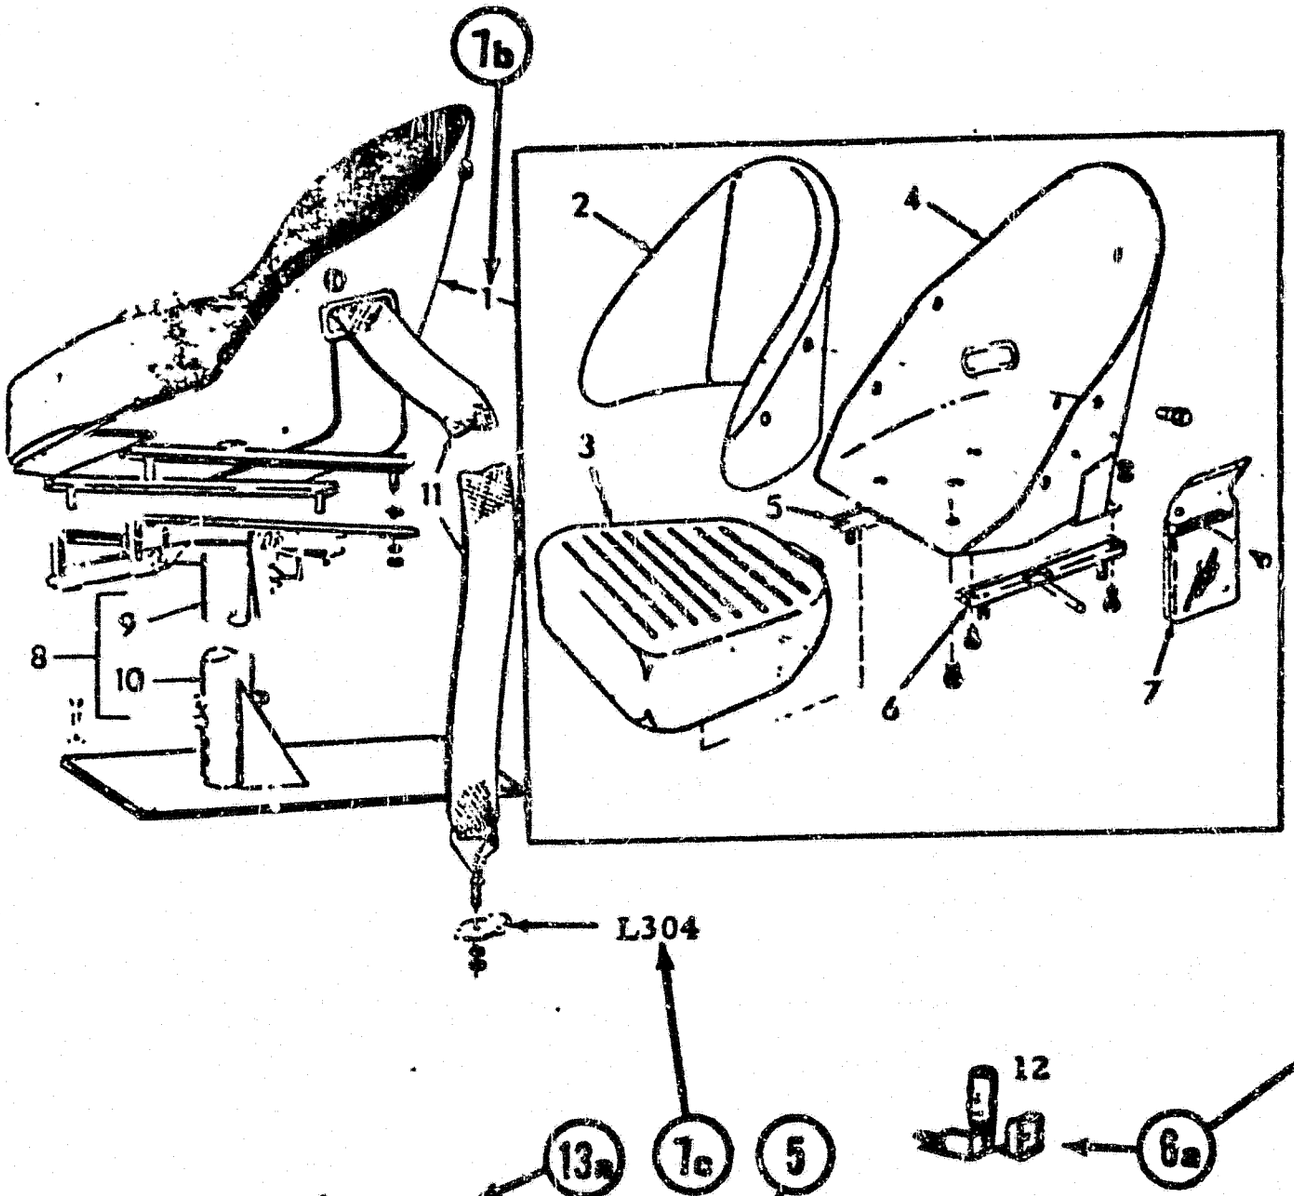

(14) (M101/2) REFER TO THIS SUBGROUP.

(15) Includes item(s) 2 through 7(2-7) i.e., if this part is ordered, all items 2 through 7 will be included.

(16) Standard part dimensional data. Notice also that attaching parts such as bolts, nuts, rivets, screws, washers, etc., are immediately following the itemized parts which they attach.

(17a) and (17b) Foot notes. Identified with a letter preceding the part number (i.e., a73073262). Please do not use the letter prefix when ordering the part.

Terms such as RIGHT, LEFT, FRONT AND REAR refer to the direction of machine forward travel.

USAGE: Series 46C and 58M

AVVERTENZA

La FIATALLIS si riserva di modificare la costruzione o il materiale di qualsiasi parte, qualora ciò risulti desiderabile, senza obbligo di apportare tali modifiche sulle unità già consegnate.
Altre pubblicazioni relative a questo modello e a tutti gli altri modelli FIATALLIS sono disponibili presso i Concessionari. Le pubblicazioni sono generalmente disponibili in diverse lingue.
Per individuare queste pubblicazioni, fare riferimento all'indice delle pubblicazioni tecniche 604.07.026. Copie dell'indice sono disponibili presso i Concessionari FIATALLIS.

ISTRUZIONI PER ORDINARE I RICAMBI

I numeri di ordinazione riportati su questo catalogo sono aggiornati alla data di uscita della pubblicazione. E'nostra politica migliorare costantemente le macchine e quindi i numeri di ordinazione e le illustrazioni possono non essere più attuali.
Al momento di ordinare i ricambi, verificare i numeri di ordinazione presso il Vostro Concessionario, che dispone delle più aggiornate informazioni.

ORDINARE I RICAMBI PRESSO IL CONCESSIONARIO DELLA VOSTRA ZONA

Le ordinazioni di parti di ricambio devono essere corredate dalle seguenti indicazioni (vedere pag. 4):

- Modello della macchina, Numero del telaio (Codice prodotto e numero telaio), Tipo del motore, Numero del motore (stampigliato sul basamento del motore).
- Indicare il numero di ordinazione della parte che si richiede (riportato sugli elenchi del catalogo), possibilmente completato dalla relativa denominazione. Se i ricambi si riferiscono a un complessivo che ha un proprio numero di modello o di serie, precisare anche questi dati.
- Precisare nell'indirizzo il codice postale, la città, la provincia e lo stato dove i ricambi devono essere spediti.
- Precisare inoltre le modalità di spedizione del materiale (via mare, via terra, via aera, espresso o pacco postale).
- Confermare per iscritto tutti gli ordini anticipati per telefono o telegrafo.

Eventuali restituzioni di parti potranno essere effettuate solamente tramite il Concessionario dal quale le parti furono acquistate e dovranno venire autorizzate in precedenza per iscritto. Ogni restituzione verrà presa in considerazione singolarmente.
I reclami per mancanze e difetti, se non effettuati immediatamente al ricevimento della merce, non verranno presi in considerazione.
In caso di ricevimento di merce danneggiata, una completa descrizione del danno dovrà venire effettuata dall'agente del Corriere trasportatore sul documento di spedizione.
La responsabilità della FIATALLIS è limitata e cessa al compimento delle condizioni di vendita previste per ogni singola fornitura.

AVVERTENZE PER LA CONSULTAZIONE DEL CATALOGO

Per una corretta ricerca delle parti di ricambio, è necessario consultare l'indice alfabetico a pagina 3/9 o l'indice numerico a pagina 6. Entrambi gli indici fanno riferimento al sottogruppo nel quale la parte è compresa. Il catalogo è diviso in sezioni, indicate a pagina 10, identificate dalla lettera del codice alfanumerico del sottogruppo.

(1a) e (1b) Codice del sottogruppo.

(2a) e (2b) Numero di foglio, utilizzato quanto il medesimo sottogruppo comprende più tavole.

(2c) Indicazione che l'elenco delle parti comprende più di una pagina (per esempio, pagina 1 di 2).

(3a) e (3b) Codici di sottogruppo seguiti da / dopo il numero indicano che si tratta di una variante o equipaggiamento speciale.

(4) Indicazione di aggiornamento. L'esempio indica che il sottogruppo ha subito le più recenti modifiche nel Febbraio, 1981.

(3) Denominazione del sottogruppo.

(6a) Indicazione dell'esistenza di Corredi di Ricambio. Nell' esempio: il corredo "Item" 12, che include gli "Item" dal 2 al 4 (6b). La composizione dei corredi è riportata nell'indice a pagina 9. Le parti componenti sono anche elencate individualmente nell'elenco delle parti di ricambio (8c).

(7a) Item: numero di abbinamento del particolare illustrato (7b) con il relativo "Part number" (8).

(7c) Il numero di abbinamento può essere sostituito da un numero di sottogruppo (esempio L304). Ciò significa che quel particolare è compreso in un altro sottogruppo.

(8) Part number: Numero di ordinazione del particolare di ricambio

(9a) QTY: Quantità complessiva per una unità.

(9b) —. Quantità da definire al montaggio.

(10) Code: Codice per la ricerca della traduzione della descrizione in lingue diverse dall'inglese e italiano elencata nell'apposita lista provvista separatamente.

(11) DESCRIZIONE: Descrizione del particolare in inglese e italiano. In caso di modifica la descrizione è completata dall'INDICAZIONE dell'ATTUAZIONE e da eventuali NORME DI RICAMBIO.

Esempi di attuazione di modifica:

(12a) FINO AL TELAIO NO. 00201, montare sulle macchine con numero di telaio fino al 10201.

(12b) DAL TELAIO NO. 00201, montare sulle macchine con numero di telaio dal 00201.

Esempi di NORME di RICAMBIO:

(13a) e (13b) Series 48C e 58M, indica che l'intero sottogruppo o uno specifico numero di particolare è usato sulle unità identificate da questi codici prodotto (vedere pagina 4).

Altre indicazioni utili possono venir inserita nella colonna DESCRIPTION/DESCRIZIONE (11), per esempio:

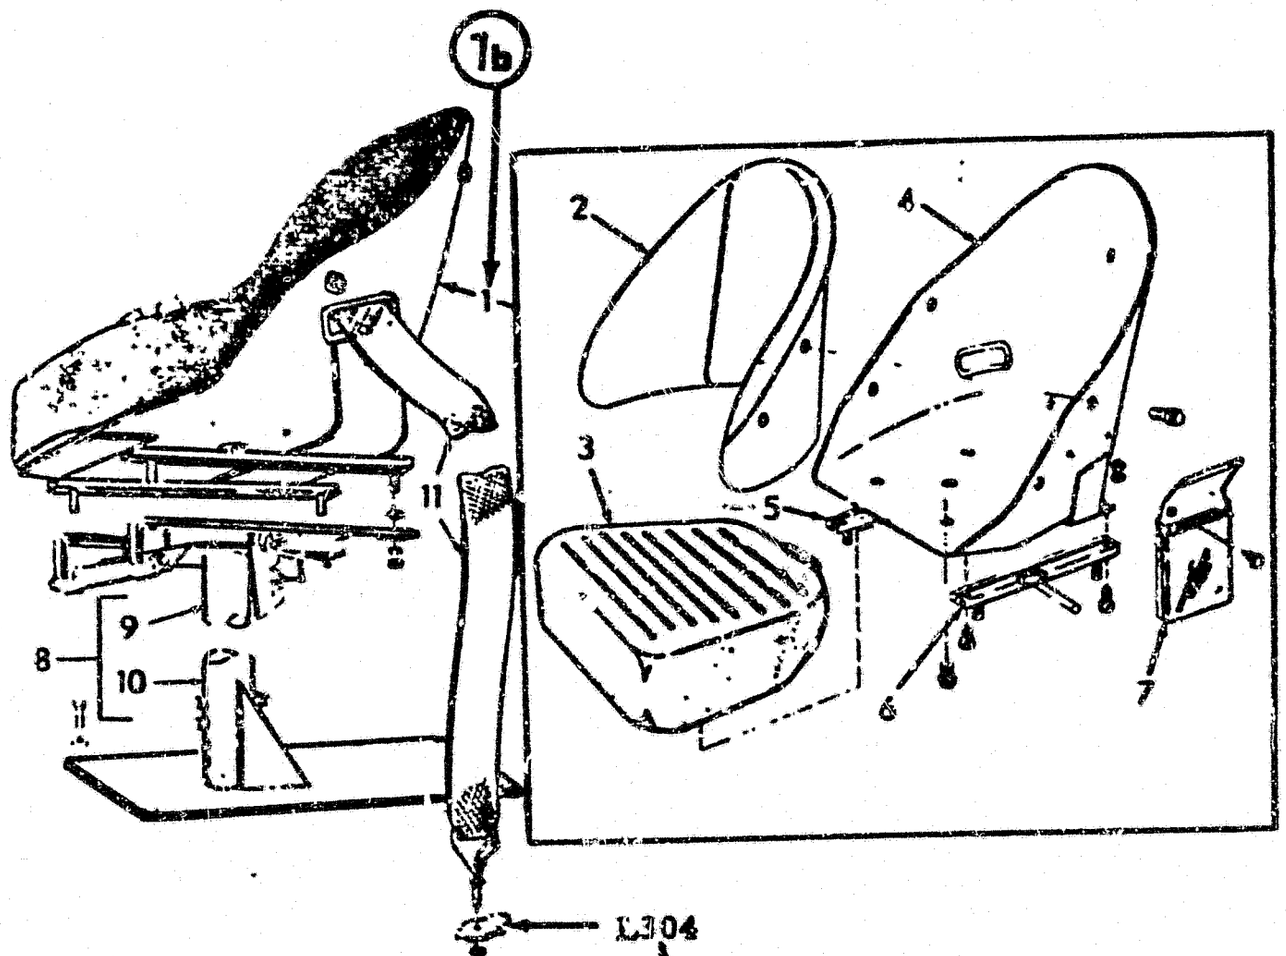

(14) (M101/2) Riferirsi a questo sottogruppo.

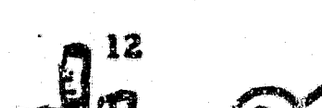

(15) Include i particolari dal 2 al 7 (2-7). Se questo particolare è ordinato, tutti i componenti dal 2 al 7 sono compresi.

(16) Dimensioni dei particolari normalizzati. Particolari come bulloni, dadi, rivetti, viti, rondelle etc., seguono immediatamente la parte sulla quale sono montati.

(17a) e (17b) Annotazioni: Identificate da una lettera di fronte al numero di particolare (es. a73073282). Non usare la lettera di richiamo nell'ordinare la parte di ricambio.

Termini come DESTRA, SINISTRA, ANTERIORE, POSTERIORE si riferiscono alla normale direzione di marcia avanti della macchina.

INSTRUCTIONS POUR LA COMMANDE DES PIECES DE RECHANGE

Les numéros des pièces indiqués dans ce catalogue sont mis à jour à la date de l'édition de la publication. Nous nous efforçons constamment d'améliorer les machines et, par conséquent, les numéros de pièces et les illustrations peuvent être périmés.
Au moment de passer une commande des pièces de rechange, contrôler les numéros de pièces chez Votre Concessionaire, qui dispose des informations mis à jour.

PASSER TOUTE COMMANDE DE PIECES DE RECHANGE CHEZ LE CONCESSIONNAIRE DE VOTRE REGION

Les commandes de pièces de rechange doivent comporter les indications suivantes (voir page 4):

- Modèle de la machine, Numéro du châssis (Code de production et Numéro de l'engin), Type du moteur, Numéro du moteur estampillé sur le bloc-cylindres.
- Indiquer le numéro de la pièce désirée (indiquée sur les listes du catalogue), accompagné si possible de sa description. Si les pièces se rapportent à un groupe possédant son propre numéro de modèle ou de série, indiquer aussi ce dernier.
- Indiquer dans l'addresse, le bureau de poste, la ville, le département et le pays où les pièces de rechange doivent être envoyées.
- Indiquer de plus le mode d'expédition du matériel (par mer, par terre, par avion, exprès ou colis postal).
- Confirmer par écrit toutes les commandes anticipées par téléphone ou télégraphe.

En cas de renvois de pièces, ils pourront être effectués seulement sur ou par l'intermédiaire du Concessionnaire chez lequel les pieces ont été achetées et ils devront être autorisés au préalable par écrit. Tout renvoi sera examiné individuellement.
Les réclamations pour manques et erreurs, qui ne seront pas présentées immédiatement à la réception de la marchandise, ne seront pas acceptées.
En cas de réception de marchandise endommagée, une description complète doit être présentée par l'agenty transporteur sur le bordereau d'expédition.
La responsabilité de FIATALLIS se limite et cesse au moment de l'exécution des conditions de vente prévues pour chaque fourniture.

MODE D'EMPLOI DU CATALOGUE

Consulter les page 3/15 de l'Index alphabétique ou l'Index numérique de la page 6 pour selectionner les pièces détachées correctes. Ces deux vous renvoient au numéro du sous-groupe acguel cette pièce appartient. Comme énuméré à la page 10, ce catalogue de pièces détachées comporte plusieurs sections qui sont identifiées par la lettre préfixe des numéros des sous-groupes.

Par ses illustrations et ses listes de pièces détachées, ce catalogue vous offre l'information suivante:

(1a) et (1b) Numéro du sous-groupe.

(2a) et (2b) Numéro de la page respective, quand plusieurs pages sont nécessaires pour le sous-groupe.

(2c) Ceci indique que la liste de pièces détachées en question se compose de plusieurs pages (se reporter à l'exemple page 1 de 2).

(3a) et (3b) Tout sous-groupe suivit d'un / à la suite de son numéro, indique un équipement soit à option, soit spécial.

(4) Indique une information complémentaire. L'exemple indique que la dernière révision date du février 1983.

(5) Titre des sous-groupes.

(6a) Ce symbole indique que un jeu-réparation fait partie de ce sous-groupe. Dans l'exemple, le jeu, repère 12, se compose des piéces 2 à 4 (6b). A la page 9, le contenu de chaque jeu est énuméré, chaque piéce étant aussi identifiée individuellement (6c).

(7a) Repère. Numéro clé pour coordonner la pièce de l'illustration (7b) avec le numéro qui la désigne (8).

(7c) Un numéro de pièce peut être remplacé par le numéro d'un sous-groupe (voir exemple L304) ce qui signifie que cette pièce fait partie d'un outre sous-groupe.

(8) Numéro de pièce. Ce numéro doit être utilisé pour la commande de pièces détachées.

(9a) Quantité. Quantité globale pour un engin.

(9b) —. Quantité à définir selon le besoin.

(10) Code. Code de référence pour traduction dans le dictionnaire (lexique) offert séparément pour l'interprétation de la description dans un langage autre que l'anglais ou l'italien.

(11) Description Nom anglais ou italien de la pièce. En cas de changement, au nom de la pièce s'additionnent L'INDICATION D'UN NUMERO EFFECTIF DE FABRICATION et les INSTRUCTIONS DE LEUR SUBSTITUTION (le cas échéant).

Exemples d'instructions de l'effectivité de numéros de fabrication:

(12a) AVANT L'ENGIN NO. 00201, doit s'installer sur engins dont le numéro de fabrication est avant 00201.

(12b) ENGINS DU NO. 00201 ET SUIVANTS, doit être installé sur les engins dont le numéro de fabrication est 00201 et au-dessus.

Exemples d'instructions pour substitutions:

(13a) et (13b) Séries 46C and 58M; cela informe que le sous-groupe entier ou un numéro spécifique de pièce détachée est utilisé pour les engins qui sont identifiés par ces codes (voir la page 4).

D'autres informations utiles peuvent être offertes dan la colonne DESCRIPTION (11) comme suit:

(14) (M101/2) VOIR CE SOUS-GROUPE.

(15) Les repères 2 à 7 sont inclus, cela veut dire que sous ce numéro les pièces correspondant aux repères 2 à 7 seront aussi inclues.

(16) Caractéristiques des pièces standard. A remarquer que les pièces qui servent à fixer, telles que boulons, écrous, rivets, vis, rondelles, etc., apparaissent directement à la suite de la liste des pièces qu'elles attachent.

(17a) et (17b) Commentaire. S'identifie par une lettre précédant le numéro de pièce (par exemple a73073262). Cette lettre ne fait pas partie du numéro de la pièce, donc ne pas l'utiliser à l'occasion de la commande de cette pièce.

Les termes tels que DROITE, GAUCHE, AVANT ET ARRIERE sont définis par la direction de l'engin quand celui-ci est en marche avant.

MODO DE EMPLEO DEL CATALOGO

Consultar el Indice alfabético de las páginas 3/27 el Indice numérico de la página 6 para encontrar los repuestos correctos. Ambos Indices hacen referencia al número del subgrupo al cual el repuesto pertenece. Este catálogo de repuestos está compuesto de varias secciones enumeradas a la página 10 las cuales están identificadas con una letra ubicada antes del número del subgrupo.

Las ilustraciones y las listas de éste catálogo ofrecen las siguintes informaciones:

(1a) y (1b) Numéro del subgroupo.

(2a) y (2b) Numéro de la página cuando más de una página son necesarias para contener el subgrupo completo.

(2c) Indica que la lista de los repuestos llena más de una página (el ejemplo muestra la primera página de dos en total).

(3a) y (3b) Subgrupos cual numéro está seguido de una / indica que se trata de un equipo a opción o especial.

(4) Indica Información complementaria. En el ejemplo, quiere decir que la última revisión de éste subgrupo ha sido hecha en el febrero de 1983.

(5) Titulo del subgrupo.

(6a) Simbolo que indica un Juego de Reparación como parte integra del subgrupo. En éste ejemplo, el juego, artículo 12, comprende los artículos 2 a 4, (6b). Los componentes de cada juego están enumerados uno por uno a la página 9 y también están identificados como artículos individuales (6c).

(7a) Artículo. Es la clave de referencia entre la ilustración (7b) y el número correspondiente del repuesto (8).

(7c) Al número del artículo se puede sustituir el número de un subgrupo (como L304 del ejemplo), lo que quiere decir que éste artículo es componente de otro grupo.

(8) Número del repuesto. Se debe utilizar para pedidos de repuestos.

(9a) Cantidad. Es la cantidad total de éstas piezas para la máquina.

(9b) La cantida a establecer según los requesitos.

(10) Código. Es la referencia para buscar en el dictionario (lexicón) provisto separadamente, la traducción de la descripción en idiomas otros que el inglés o italiano.

(11) Descripción. La descripción de la pieza aparece en inglés como en italiano. En el caso de una modificación, se agrega a la descripción de la pieza LA INDICACION DEL NUMERO EFECTIVO DE FABRICACION Y INFORMACION SOBRE SUSTITUCION (si es aplicable).

Ejemplos de informaciones de números efectivos de fabricación:

(12a) ANTES DE LA MAQUINA NO. 00201, debe instalarse sobre máquinas cuyo número de fabricación es inferior a 0020.

(12b) MAQUINAS NO: 00201 Y ADELANTE, debe instalarse sobre máquinas cuyo número de fabricación es 00201 y superior.

Ejemplos de informaciones sobre sustitución:

(13a) y (13b) Serie 48C and 58M, indica que el subgrupo completo o un numéro de pieza se usa para las máquinas identificadas con estos códigos de fabricación (referirse a la página 4).

Algunas otras útiles informaciones se pueden ofrecer bajo DESCRIPCION (11) como sigue:

(14) (M101/2) REFERIRSE A ESTE SUBGRUPO.

(15) Artículos 2 a 7, por ejemplo; al pedir ésta pieza, los artículos de 2 a 7 tambien estarán incluidos.
