IMPORTANT SAFETY NOTES REGARDING WINDSHIELD REPLACEMENT

- Aftermarket windshields and surrounding moldings/ gaskets are very frequently **NOT** manufactured to the stringent quality standards set by Hino Motors Sales, Inc. (HMS)
- Despite the claims of some aftermarket glass manufacturers, **NO** aftermarket glass company has access to Hino's exacting specifications and tooling, nor do they validate their product to Hino's exacting standards.
- As a result, aftermarket windshield frequently use inferior materials, which can negatively and drastically impact installed safety systems that rely upon forward-facing cameras.
- Hino Trucks equipped with these systems **should only have windshields replaced with the proper OEM windshield**. Additionally, forward-facing **cameras must always be recalibrated following any windshield installation**. Refer to HMS service department & FMVSS for more information, and **use extreme caution** when replacing windshields.
- Sun visors may **NOT** be installed on any Hino Truck equipped with a windshield-mounted camera &/or lane departure system.
