SERVICE PARTS MANUAL

GEHL®

Introduction

When ordering service parts, specify the correct part number, full description, quantity required, the unit model number and serial number.

The model and serial numbers for this unit are on a Decal located inside the right Chassis Riser, between the Lift Arm and Lift Cylinder. "Right" and "Left" are determined from a position sitting on the Seat and facing forward.

GEHL® Company reserves the right to make changes or improvements in the design or construction of any part of the unit without incurring the obligation to install such changes on any previously delivered units.

NOTE: *On original tire replacement, Company policy prohibits the sale of replacement tires for all GEHL machinery. Replacement Wheel Sets are available and tire size information is called out with the Wheel Sets to facilitate replacement tire selection. ALL REPLACEMENT TIRES MUST BE PURCHASED LOCALLY.*

NOTE: *Replacement batteries are not provided by the GEHL Company. For battery specifications see pages titled "Battery & Engine Electrical Wiring." ALL REPLACEMENT BATTERIES MUST BE PURCHASED LOCALLY.*

Refer to the abbreviations table located on this page for the various fastener descriptions. Standard attaching hardware torque values are also provided on the inside back cover.

Items shown in the parts list that do not have Reference Numbers are shown for reference purposes only and are NOT available for purchase.

Unless otherwise specified, all Cap Screws or Bolts are Grade 5, cadmium or zinc plated; Hexagon Nuts for Grade 5 Screws or Bolts are Grade B; Hexagon Nuts for other Screws or Bolts are Grade A.

Refer to the Operator's manual for additional information regarding GEHL attachments and accessories.

NOTE: *The following abbreviations may be used herein:*

A/C	- Air Cleaner
AR	- As Required
ASSY	- Assembly
C5Z	- Class 5 Zinc Plated
CB	- Carriage Bolt
CS	- Cap Screw (Hexagon Head)
CYL	- Cylinder
DEG	- Degree
FW	- Flat Washer
GR	- Grade
HHC	- Hex Head Cap Screw
INT	- Internal
JIC	- Joint Industry Conference
L	- Lock Washer
LN	- Lock Nut
LT	- Left
MM	- Millimeter
N	- Nut (Hex Head)
N/A	- Not Applicable
NEG	- Negative
NILN	- Nylon Insert Lock Nut
NF	- National Fine
NPT	- National Pipe Thread
P	- Plain Washer
PBY	- Power Beyond
PL	- Plain
POS	- Positive
REF	- Reference
RHMS	- Round Head Machine Screw
ROPS	- Roll-Over Protective Structure
RT	- Right
SHCS	- Socket Head Cap Screw
SHSS	- Socket Head Set Screw
SN	- Serial Number
SQ	- Square
STR	- Straight
T	- Teeth
TCS	- Thread Cutting Screw
TFS	- Thread Forming Screw
THMS	- Truss Head Machine Screw
THRD	- Thread
UNC	- Unified National Coarse (Thread)
UNF	- Unified National Fine (Thread)

SL5625 - DECALS

Decals

NOTES

Decal Application

CAUTION

ALWAYS read and abide by the safety rules and information shown on the decals. If decals become damaged, unreadable or if the unit is repainted, the decals **MUST** be replaced. If repainting, make sure all decals which apply to the machine are properly affixed to the unit in their proper location.

Decal location information is provided to assist in the proper selection and application of new decals in the event of the original decals become damaged or the machine is repainted.

For correct replacement of decals, compare the close-up location photographs to your machine before starting to refinish the unit. Check off each required decal using the illustration reference number to find the part number, description, and quantity in the list. Refer to the appropriate illustrations for replacement locations.

NOTE: *Refer to the SAFETY chapter of the Operator's Manual for the specific information provided on all of the various Safety Decals.*

Before applying decals, surfaces must be free from dirt, dust, grease, and other foreign material. To apply a decal, remove the smaller portion of the decal backing paper and apply exposed adhesive backing to the clean surface while maintaining proper position and alignment. Slowly peel off the other backing paper while applying hand pressure to smooth out the decal surface.

TORQUE SPECIFICATIONS FOR STANDARD MACHINE HARDWARE**

All Torque Values are in Ft-Lbs unless otherwise stated.

(Multiply In-Lb value (*) by 0.113 or Ft-Lb value by 1.355 to obtain metric Nm value)
