

MAHINDRA JIVO 365 4WD,
POWER, PERFORMANCE, PROFIT.

Mahindra JIVO brings unmatched power with its 36HP DI engine to carry out various farm operations with ease. This lightweight 4wd **Puddling Master**, when used with rotavator gives uniformly levelled field and better quality for puddling. Its **ADDC with PAC** feature helps you to work effortlessly without constantly adjusting the PC, thereby **delivering superior performance**. Mahindra JIVO also means **greater profits** because of its less fuel consumption, higher fuel tank capacity, low maintenance, best-in-class mileage, and easy spare part availability with low cost of parts.

Get the new Mahindra JIVO 365 4WD to experience power, performance and profit like never before.

Features	Mahindra JIVO 365 DI 4WD
Engine Type	Mahindra DI Engine
Engine Power HP	36
Rated RPM	2600
Maximum Torque (at Rated RPM)	118Nm
Max. PTO Power	30 HP
No. of PTO Speed	Two (590, 845 RPM)
Fuel Tank capacity	35 Ltr.
Tyre Size	Front 8x16 Rear 12.4x24
Ground clearance	390 mm
Turning Radius (M)	2.5 m
Air Cleaner	Dry Type
Steering	Power Steering
Transmission Type	Constant Mesh with Sync Shuttle
Speed of tractor (Km/h)	Min: 1.7 Max.: 23.2
Hydraulics	ADDC with PAC
Lifting Capacity (kgs)	900
Brake Type	Oil Immersed Brakes with 3 Discs

PRESENTING MAHINDRA JIVO 365 DI 4WD

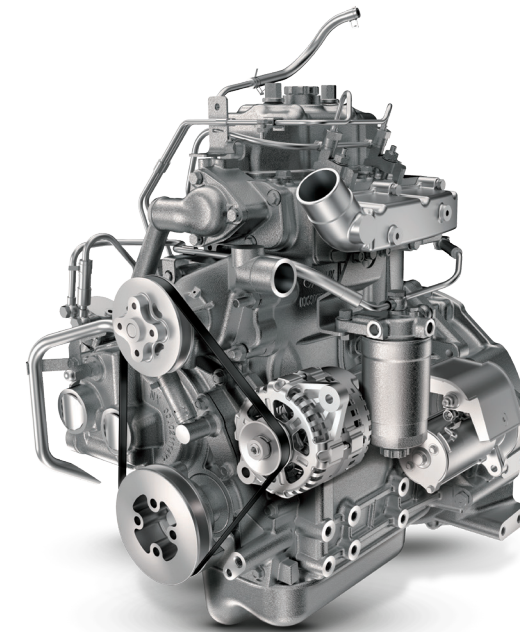

Robust and Powerful, the new Mahindra Jivo 365 DI 4WD is a
lightweight tractor designed specially for application in paddy fields.

Jivo 365's advanced 36HP DI engine gives unmatched power and
best-in-class mileage. It is the first tractor in India equipped with the
revolutionary Position-Auto Control (PAC) technology that makes it
the absolute Master of Puddling.

INTRODUCING FOR THE 1ST TIME IN INDIA ADDC WITH PAC TECHNOLOGY

The Position Auto-Control (PAC) feature of Jivo 365 and Mahindra Rotavator provides excellent control over the depth of puddling. With PAC, the Rotavator can automatically adjust the puddling depth, without any need for adjustment to PC lever.

- PAC technology eliminates the need for continuous adjustment of Rotavator through PC lever
- Effortless operation & more comfort for longer working hours
- No stalling of tractor and less tyre slippage in toughest soil conditions
- Ensures uniformly levelled field for seed germination suitable for rice-transplanter

DI ENGINE

THE **POWER** TO ACHIEVE MORE WITH ADVANCED 36 HP DI ENGINE THAT

- Gives highest torque in the segment (118 Nm)
- Generates Higher Backup Torque so tractor will not stall due to sudden increase in load
- Delivers 30 HP PTO power for superior productivity
- Operates on Low Rated RPM increasing Engine Life
- Has Low Engine SFC for greater mileage

THE LIGHT WEIGHT 4WD WONDER

The combination of lightweight built and 4WD make Mahindra Jivo 365 DI the ideal tractor for doing puddling even in soft and high sinking soils.

While other heavier tractors will sink deeper and get stuck in wet soil conditions, Jivo 365 is able to pull larger implements with greater ease in tough conditions.

The lightweight built also results in less soil compaction, uniformly levelled field and better quality of puddling.

DESIGNED FOR UNMATCHED PERFORMANCE

- Dual Speed PTO for superior performance with Mahindra's 1.6m Rotavator in puddling operation
- Superior Quality Paddy special High-Lug tyres designed for tough soil conditions
- Higher Ground clearance
- Oil Immersed Brakes with 3 discs for more effective braking
- Faster Speed of operation
- Ability to work with Cultivator and Plough

Easily pulls a 9 tyne cultivator

Choose the right speed with 8+8 Side shift gear box, providing better output during land preparation

Sync-Shuttle for easy Forward Reverse operation in Puddling

4WD with power steering gives better traction with unmatched maneuverability

TRACTOR THAT GIVES YOU MORE **PROFIT** BECAUSE OF

Light-weight leads to less fuel consumption

Higher fuel tank capacity (covers more area in one fill up)

Low cost of maintenance due to superior engine

Easy spare parts availability

Best-in-class mileage, thus lower cost of operation
