TABLE

The third column "**Reference**" represents Part number.

The fourth column "**Description**" represents the part description i.e name of the part.

The fifth column "**Qty**" represents the quantity of the part used in that assembly.

In the sixth column "**Remarks**" represents the any special comment for that part.

In the seventh column "**Interchangeability**" represents parts interchangeability concept.

The last column "**Cut Off**" represents the chassis number of the tractor from which the part is used.

INTERCHANGEABILITY CONCEPT:-

As improvement is a continuous process in order to give the best performance from your tractor changes are done in the components. In order to facilitate our customers that whether the previous part can be replaced with the new one or not, coding is done for this purpose.

e.g

10002341AA (Reference /Part Number)

10002341AB

10002341AC

If the first alphabet of the part i.e "A"(10002341AA) does not change and second alphabet change then as in part 10002341AB from "A" to "B" then the parts are interchangeable i.e any one of them can be used. Better is to use the last revision i.e the latest revision means this is better version of the same part.

And if first alphabet of the part i.e "A"(10002341AA) changes from "A" to "B" (10002341BA) then it means both can not be interchanged whenever the first letter changes its interchange with the previous revision vanishes.
