Notes About this Catalog

Sections

Most of the Sections are setup with photographs of featured parts available from DeFeo Manufacturing on the left page, with corresponding parts listings on the right page. The part photographs have been placed in a grid containing a letter corresponding to the column, and a number representing the row.

The Parts listings contain a Photo Number in the rightmost column corresponding to the location in the grid for that part in that particular transmission series section.

For Quick Reference the DeFeo Manufacturing number has been placed below each photograph as well.

Understanding the Part Numbering

All Part numbers contain one of the following prefixes: DF, A, R, or U.

The **(DF)** prefix corresponds to a **DEFEO NEW MANUFACTURED PART**

The **(A)** prefix corresponds to a **GENUINE ALLISON NEW PART**

The **(R)** prefix corresponds to a **REFURBISHED PART** (Available exchange or outright)

The **(U)** prefix corresponds to a **GOOD USED or GOOD TAKEOUT PART** (These parts are inspected prior to placing in inventory)
